Waves, sound and light	Reflection Laws 3.4 & 3.5	Ayman Al Omari	
Student No:		Student Name:	
		Group:	VEDC+

Fill in the space:-

- Objects that reflect light well are: **smooth** surfaces, **shiny** surfaces, and usually **pale** colours. They give clear images because **reflect light regularly**.
- Objects that do not reflect light well, such as **walls** and **tables** : have **rough, mat** surfaces and are usually **pale** colours. They give **difuse** images (or do not give any images) because they reflect light **irregularly**. This is called **scattering**.
